Information Management: A Proposal

Abstract

This proposal concerns the management of general information about accelerators and experiments at CERN. It discusses the problems of loss of information about complex evolving systems and derives a solution based on a distributed hypertext system.
“Killer Web Sites’ are usually those which tame the wildness of the web, constraining pages as if they were made of paper – Desktop Publishing for the Web.”

—John Allsopp
A Dao of Web Design
“The web is a new medium, although it has emerged from the medium of printing, whose skills, design language and conventions strongly influence it. Yet it is often too shaped by that from which it sprang.”

—John Allsopp  
A Dao of Web Design
Each new medium begins its life by imitating its predecessors. Many early movies were like filmed stage plays, much early television was like radio with pictures or reduced movies.

The Road to Enlightenment

Littering a dark and dreary road lay the past relics of browser-specific tags, incompatible DOMs, and broken CSS support.

Today, we must clear the mind of past practices. Web enlightenment has been achieved thanks to the tireless efforts of folk like the W3C, WaSP and the major browser creators.

The css Zen Garden invites you to relax and meditate on the important lessons of the masters. Begin to see with clarity. Learn to use the (yet to be) time-honored techniques in new and invigorating fashion. Become one with the web.

So, What is This About?

“When an elevator fails, it’s useless.
When an escalator fails, it becomes stairs.
We should be building escalators, not elevators.”
